MOUNTING INSTRUCTIONS

1. Remove all paint, dirt and oil from the mounting surfaces of the winch case, tractor, adapter brackets and spacers. The mounting surfaces must be clean and dry to provide a secure mount and resist movement while in use.
2. Remove the transmission cover from the rear of the tractor. The cover may be modified for clearance with the winch and reinstalled after the winch installation is completed.
3. If the tractor is equipped with a ripper circuit, remove the ripper supply tubes and cap the ports at the control valve. Remove the ripper joystick control valve from the console and cap the lines as directed in the tractor service manual.
4. Install the coupling, item 2, onto the tractor accessory drive shaft as directed in the tractor service manual. Refer to detail A.
5. Install the driveline assembly, item 13, onto the drive coupling, item 2. Be certain to remove all paint, oil or rust from the mating surfaces of the u-joint and yoke that may lead to loosening of the connection. Apply Loctite 242 to capscrews, item 5, and install with washers, item 6. Tighten the capscrews, item 5, to 44 lb.-ft. (60 N·m) torque.
6. Inspect the tapped holes in the rear face of the tractor. Make certain the threads are clean of rust and paint and that the thread depth will accommodate full engagement of the mounting fasteners.
7. Apply Loctite 271 to the clean, dry threads of studs, item 12. Install the studs into the tractor to a height of 2.75 in. (70 mm) as shown.
8. Apply Loctite 271 to the clean, dry threads of studs, item 14, and capscrews, item 21. Install the studs into the adapters, items 22 & 23, fully until the threads bottom out in the adapters.
9. Install spacers, item 11 between the adapters, items 22 & 23, and the winch. Tighten the nuts, item 20, and capscrews, item 21 only snug at this time. Some slight movement of the adapters may be necessary when installing the winch with adapters onto the tractor.

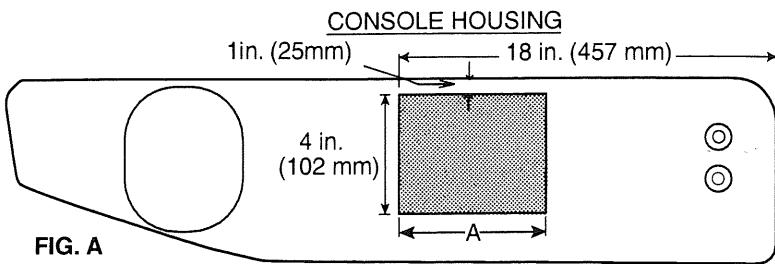

! WARNING

Winch and mounting adapters weighs approximately 2800 lb. (1270 kg) without wire rope (cable) or oil. Make certain lifting equipment has adequate capacity. Attempting to lift the winch with inadequate equipment may result in personal injury or property damage.

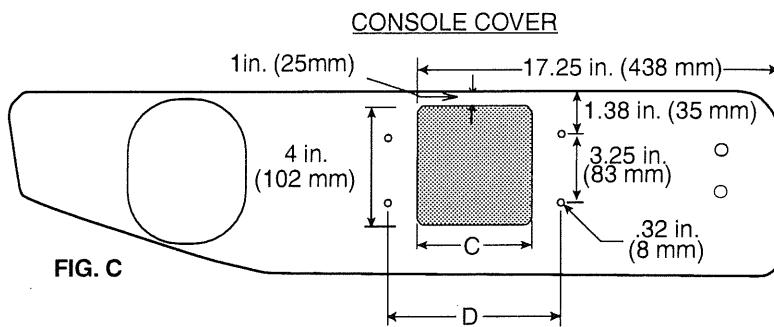

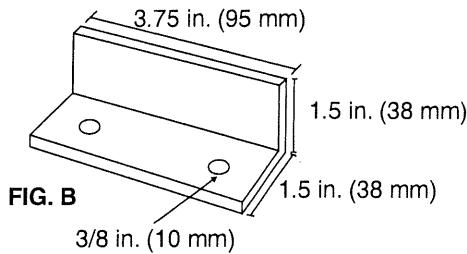

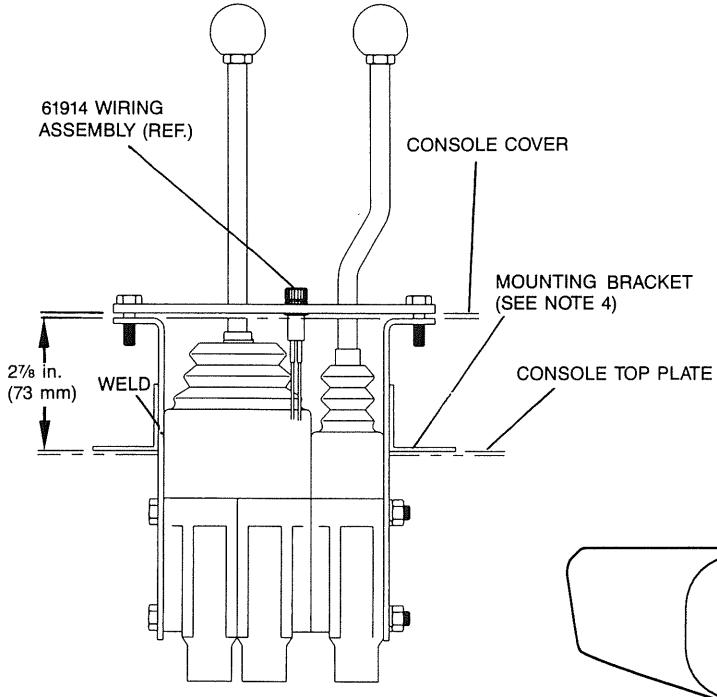

10. Place one spacer bar, item 16, onto each stud on the rear face of the tractor. Install the winch onto the studs while guiding control cables into position under the right hand console. Apply Loctite 271 to the clean, dry threads of nuts, item 10, and capscrews, items 9 & 15. Tighten the 24 mm fasteners to 650 lb.-ft. (880 N·m); 33 mm fasteners to 1200 lb.-ft. (1630 N·m) torque.
11. Tighten nuts, item 20, to 980 lb.-ft. (1300 N·m) torque. Tighten capscrews, item 21, to 680 lb.-ft. (900 N·m) torque.
12. Install the driveline assembly onto the winch gearbox yoke. Align driveline ends to assure bearing crosses are in phase. Be certain to remove all paint, oil and rust from the mating surfaces of the u-joint and yoke that may lead to loosening of the connection. Apply Loctite 242 to capscrews, item 7, and install with washers, item 1. Tighten the capscrews, item 7, to 38 lb.-ft. (52 N·m) torque.
13. Check oil level in adapter gearbox and fill to level plug with SAE 90, GL5 gear oil. Oil capacity of gearbox is 1.8 qt. (1.7 l).
14. Fill winch to sight glass level plug with recommended oil. Oil capacity of winch case is 78 qt. (74 l).

CONTROL INSTALLATION INSTRUCTIONS

Note: These instructions are provided as a general guide. Tractor options, special application requirements or local regulations may require deviation from these recommendations.

1. Remove the armrest, console cover and side plates from the tractor right hand console.
2. If the tractor is equipped with a ripper control circuit, remove the joystick control valve and piping from the console. Cap the opened lines as recommended in the tractor service manual.
3. Remove the shaded area from the top plate of the right hand console housing as shown in figure A. Grind smooth and repaint rough areas as required.
4. From a piece of approximately $1\frac{1}{2} \times 1\frac{1}{2} \times \frac{3}{16}$ in. angle iron, fabricate two small mounting brackets as in figure B. The brackets must be able to bolt to the top plate of the console housing. Weld the fabricated mounting brackets to the side of the control stand kit such that the top of the control stand bracket is $2\frac{1}{8}$ in. (73 mm) from the bottom of the angle bracket. The $2\frac{1}{8}$ in. (73 mm) dimension is the clearance from the top of the console cover to the top plate of the console housing.
5. Carefully route the control cables, filter light wiring assembly and pressure gauge hose (if equipped) from the winch to the underside of the right hand console. Pass the control cables up through the console top plate and install them into the control lever assembly. Refer to the Model 70A service manual, PC-137 for installation and adjustment procedures.

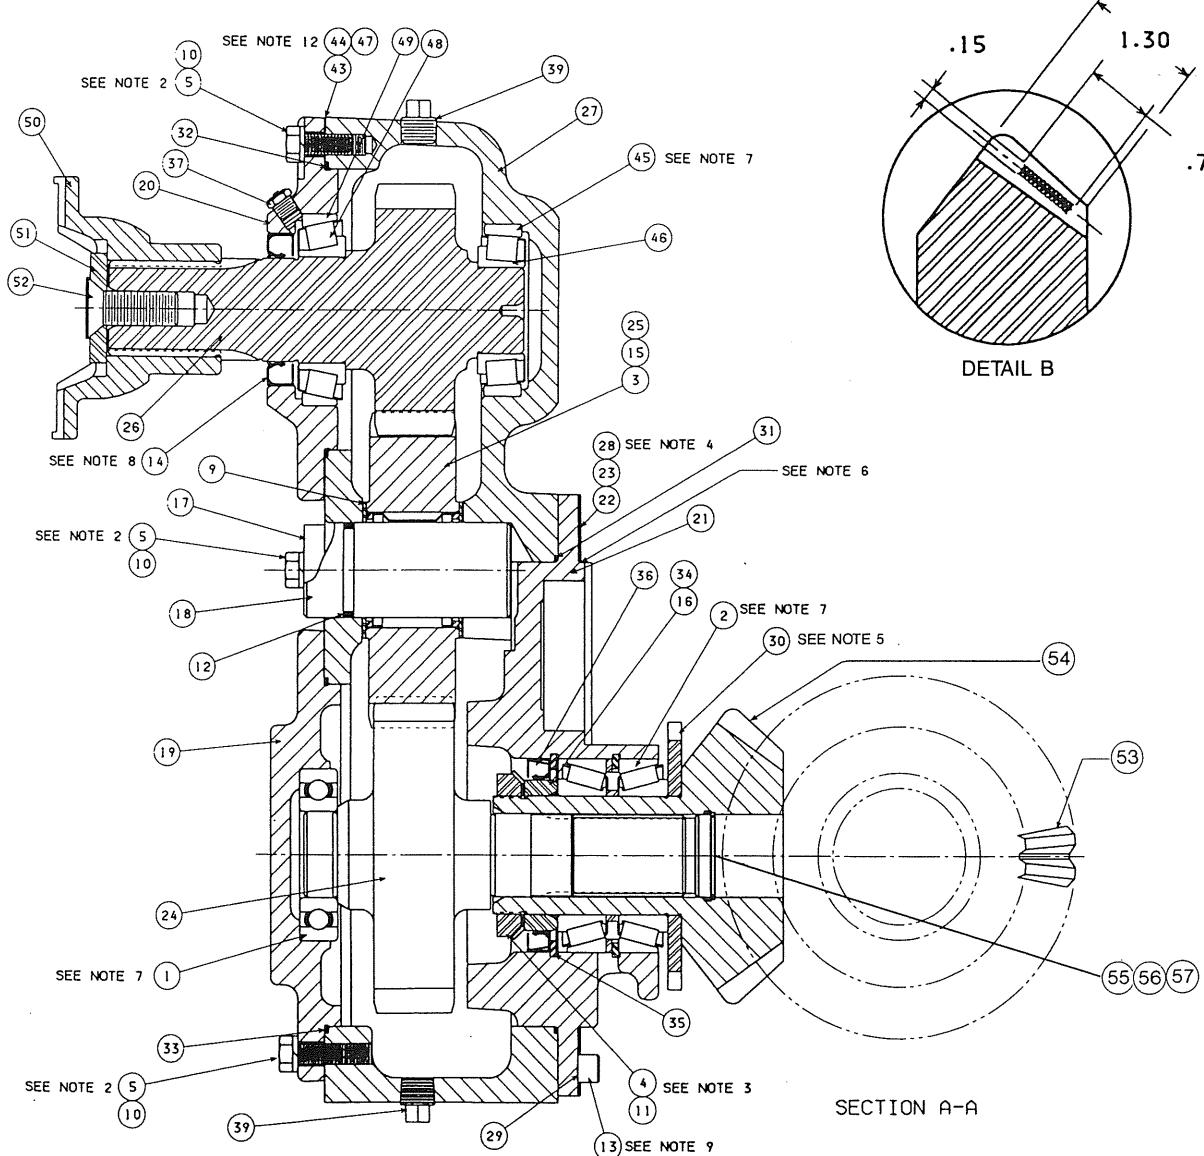

! CAUTION

Avoid routing cables near moving shafts or linkage that may cause damage to cables or restrict free movement of tractor components.

6. Bolt the control lever assembly to the top plate of the console housing. Remove the gate plate from the top of the control lever assembly. Modify the console cover as shown in figure C. Install the console cover onto the console housing and control lever assembly.
7. Install the filter indicator light wiring assembly into the gate plate. The free end of the indicator light wiring harness must be supplied 24 volt DC. The circuit is grounded through the filter bypass sending unit in the winch. Restraine the control cables, light wire and gauge hose with plastic tie straps as required to prevent chafing.
8. Install the gate plate onto the console cover using the original fasteners that held the gate plate onto the control lever assembly.
9. Mount the pressure gauge in clear view of the operator.
10. If the winch is equipped with the optional Manual Override (MOR) brake system, please refer to pages 14-15 for piping instructions when installing the control valve.
11. Verify proper control cable adjustment by following the instructions found on pages 8-10 of the Operators Manual, PC-104.
